ELSEVIER

Thin Solid Films 327–329 (1998) 865–884

thin solid films

Subject Index of Volumes 327–329

Absorbance photoluminescence
The formation of J-aggregates in mutual mixing merocyanine dyes LB films, 446
AC conductivity
Power-law conductivity in merocyanine LB films, 387
Acetylcholinesterase
Effect of pH on acetylcholinesterase Langmuir and Langmuir–Blodgett films studied by surface potential and atomic force microscopy, 56
Fiber-optic biosensor for the detection of organophosphorus compounds using AChE-immobilized viologen LB films, 676
Adenine
Construction of two-dimensional DNA-mimetics: supramolecular architecture with highly stacked base-pairs of amphiphilic adenine and thymine at the air–water interface, 603
Adhesion
Effect of substrate anchoring on the mechanical strength of Langmuir–Blodgett bilayers, 772
Adhesion force
Force titration of amino group-terminated self-assembled monolayers of 4-aminothiophenol on gold using chemical force microscopy, 778
Adsorption
Adsorption isotherms of poly(*o*-methoxyaniline), 739
Molecular strings at surfaces: 'forced assembly' of bithiophene on a sulphur p(4 × 1)Ni(110) surface, 204
Adsorption enthalpy
Adsorption isotherms of poly(*o*-methoxyaniline), 739
Adsorption kinetics
Adsorption kinetics of alkanethiols studied by quartz crystal microbalance, 191
Adsorption layer
Phase transition in adsorption layers at the air–water interface: structure features of the condensed phase, 842
Ag thin film
Scattered light due to excited surface plasmon in arachidic acid LB ultrathin films on silver thin films, 360
Aggregation
Aggregation and orientation phenomena in constrained films of LC poly(olefin sulfone)s, 214
Molecular orientation of octaalkoxyphthalocyanine derivatives in Langmuir–Blodgett films, 87
Air–water interface
Competition of interactions in monolayers of amphiphilic acid amides at the air–water interface, 857
Monolayers and Langmuir–Blodgett films of the electrochromic dye Di-8-ANEPPS, 804
Infrared spectroscopy of aqueous biophysical monolayers, 308
Polarisation modulation IRRAS investigation of a cellulose ether at the air/water interface, 299
Alkanethiol
Adsorption kinetics of alkanethiols studied by quartz crystal microbalance, 191
Molecular structure and surface order in monolayers of alkanethiols evidenced by HREELS, 156
Alkylammonium perfluoroalkanoates
Monolayer properties of alkylammonium perfluoroalkanoates on concentrated sodium chloride solution, 123
Alternate adsorption
Layer-by-layer self-assembly of polyelectrolyte and water soluble cyanine dye, 748
Alternate deposition
Ultrathin multilayers made by alternate deposition of ionenes and polyvinylsulfate: from unstable to stable growth, 734
Alternate-monolayer structure
Study of horseradish peroxidase activity in alternate-layer Langmuir–Blodgett films, 621
Amidation
Dendritic growth strategies for construction of ultrathin organic films on solid substrate, 221
Amphiphile layer
Monolayer properties of amphiphilic molecules supported on nano-rough surfaces: a Monte Carlo study, 850
Amphiphile
Phase transition in adsorption layers at the air–water interface: structure features of the condensed phase, 842
Amphiphilic dye
Photosensitive and ionoselective properties of the amphipilic crown-ether dye in monolayers, 821
Amphiphilic molecule
A Monte Carlo study of bilayer formation in a lattice model, 846
Anchoring
Alignment of nematic liquid crystals on mixed Langmuir–Blodgett monolayers, 681
Antibody fragments
In situ quartz crystal microbalance monitoring of Fab′-fragment binding to linker lipids in a phosphatidylcholine monolayer matrix. Application to immunosensors, 643
Arachidic acid LB ultrathin film
Scattered light due to excited surface plasmon in arachidic acid LB ultrathin films on silver thin films, 360
Arachidic acid
Molecular sifter using space controlled Langmuir–Blodgett films by fullerene molecules, 655
Study on the self-packing of SnO_2 nanoparticles at the air–hydrosol interface and its composite LB films with arachidic acid, 33
Thermally stimulated currents of Langmuir–Blodgett films, 403
Archaebacteria
An X-ray reflectivity study of monolayers and bilayers of archae lipids on a solid substrate, 52

0040-6090/98/$19.00 © 1998 Elsevier Science S.A. All rights reserved
PII S0040-6090(98)01049-9

Aromatic hydrocarbons
Optical sensing of aromatic hydrocarbons using Langmuir–Blodgett films of a Schiff base co-ordination polymer, 726
Assembly
Assembly and applications of the inorganic nanocrystals in polymer networks, 536
Atomic force microscope
Electrical conduction in monolayers and LB films of BED-OTTF-C_{10}TCNQ/arachidic acid mixed system, 450
Nanometer-scale lithography of the Langmuir–Blodgett films with atomic force microscope, 690
Atomic force microscopy
Atomic force microscopic studies on the growth of self-assembled monolayers on $SrTiO_3$-surfaces, 185
Deposition of Langmuir monolayers using conical trough, 9
Effect of pH on acetylcholinesterase Langmuir and Langmuir–Blodgett films studied by surface potential and atomic force microscopy, 56
Fiber-optic biosensor for the detection of organophosphorus compounds using AChE-immobilized viologen LB films, 676
Monolayer assembly of long-chain histidine derivative for arrangement of cytochrome *C* molecules, 113
Photocurrent of bacteriorhodopsin films deposited by electrophoretic method, 698
Structure of SAMs generated from functionalized thiols on gold, 150
Attenuated total reflection
Evaluation of liquid crystal molecules on polyimide LB films using attenuated total reflection measurement, 353
Scattered light due to excited surface plasmon in arachidic acid LB ultrathin films on silver thin films, 360
Avidin
DNA-containing organized molecular structure based on controlled assembly on supported monolayers, 647
Axisymmetric drop shape analysis (ADSA)
Interfacial relaxation of phospholipid layers at a liquid–liquid interface, 224
Azobenzene
Monolayers of complexes from amphiphiles and rigid rod-like polyelectrolytes, 90
Organic/inorganic Langmuir–Blodgett films based on metal phosphonates 2: zirconium phosphonate-based alternating layer films, 131
Surface-enhanced infrared spectra of azobenzene LB monolayers on silver island film, 287
Photoinduced properties of liquid crystalline azobenzene polymer in Langmuir–Blodgett films investigated by surface plasmon resonance, 427
Light-induced J-aggregation in mixed Langmuir–Blodgett films of selenium-containing cyanine and azobenzene, 813
Azo-dyes
Complexation of metal ions with Langmuir–Blodgett films of novel calixarene azo-derivative, 686
Bacteriorhodopsin
Photocurrent of bacteriorhodopsin films deposited by electrophoretic method, 698
Ballistic deposition model
Monolayer properties of amphiphilic molecules supported on nano-rough surfaces: a Monte Carlo study, 850
BAM images
Study on microstructures of mixed monolayers of poly (octadecylacrylate) and octadecanol in relation to the retardation of water evaporation, 109
Battery
Temperature-independent conductivity of Langmuir–Blodgett films of a helical polymer and its salt complex, 364
BEDO-TTF
ESR properties of Langmuir–Blodgett films based on BO and behenic acid, 458
Benzene derivatives
Monolayer properties of amphiphilic tetrakis(phenylethynyl)-benzene compounds, 74
Bias voltage
Fabrication and characterization of charge-transfer complex films by a bias-voltage LB technique, 792
Effects of counterions on the orientation control of photosynthetic reaction center proteins in an applied bias-voltage Langmuir–Blodgett method, 800
Biomaterials
Langmuir–Blodgett film of hydrogenase for electrochemical hydrogen production, 639
Biomineralization
Growth of FeO(OH) crystals on self-assembled monolayers on gold, 571
Bipolar lipids
An X-ray reflectivity study of monolayers and bilayers of archae lipids on a solid substrate, 52
Bis-ethylenedioxy-tetrathiafulvalene
Recent progress in metallic Langmuir–Blodgett films based on TTF derivatives, 14
2,4-bis(*N*-octadecylpyrrol-2-yl)squaraine
A comment upon the second-order non-linear optical properties of 2,4-bis(*N*-octadecylpyrrol-2-yl)squaraine, 461
Blue-shifted band
Control of aggregate formation in merocyanine Langmuir–Blodgett films, 345
Boltzmann statistics
Calculation of the dielectric constant of monolayers with dielectric anisotropy with a consideration of molecular configuration, 395
Brewster angle microscopy
Spreading concentration effect on the morphology of phospholipid monolayers, 84
Monolayers of complexes from amphiphiles and rigid rod-like polyelectrolytes, 90
Study of Langmuir monolayers of crown-ether C_{60} derivatives and their interaction with different subphase ions, 141
Mesogenic structural effects on monolayer behaviors of the liquid crystalline polysiloxanes at the air/water interface, 145
Monolayer studies of methyl *vic*-dihydroxyoctadecanoates, 180
Influence of head group methylation on the phase behavior of lipid monolayers, 256
Electrical conduction in monolayers and LB films of BED-OTTF-C_{10}TCNQ/arachidic acid mixed system, 450
Phase transition in adsorption layers at the air–water interface: structure features of the condensed phase, 842
Brilliant green dye
Negative photoelectrical properties of adsorption Langmuir–Blodgett films, 399

C60 derivatives
Study of Langmuir monolayers of crown-ether C_{60} derivatives and their interaction with different subphase ions, 141
Cadmium stearate
Preparation and characterization of composite LB films of lignin and cadmium stearate, 47
Calcium carbonate
Template induced crystallization of biominerals on self-assembled monolayers of alkylthiols, 554
Calcium palmitate
Hydration number of calcium palmitate LB film deposited on a piezoelectric quartz crystal plate, 722
Calix[8]arene
The temporal and thermal stability of pyroelectric calix[8]arene Langmuir–Blodgett films, 431
Calixarenes
Inclusion phenomenon in mixed floating layers containing phthalocyanines, 104
Size-quantization in extremely small CdS clusters formed in calixarene LB films, 510
Complexation of metal ions with Langmuir–Blodgett films of novel calixarene azo-derivative, 686
Cast film
Mesoscopic patterns of molecular aggregates on solid substrates, 854
Catenane
Growth and characterization of benzylic amide [2]catenane thin films, 321
CD_2 band
Infrared spectroscopy of aqueous biophysical monolayers, 308
CdS
Size-quantization in extremely small CdS clusters formed in calixarene LB films, 510
CdS nanoparticle
Preparation and structure of quantum-sized cadmium sulfide grown in amphiphilic oligomer Langmuir–Blodgett films, 408
CdS nanoparticles
Structure and characterization of surfactant-capped CdS nanoparticle films by the Langmuir–Blodgett technique, 559
Cellulose alkyl ether
Polarisation modulation IRRAS investigation of a cellulose ether at the air/water interface, 299
CH_2 band
Infrared spectroscopy of aqueous biophysical monolayers, 308
Chain-chain interaction
Surfactant monolayers at solid–liquid interfaces: conformation and interaction, 161
Charge accumulation
High frequency alternating current light-emitting diodes using Langmuir–Blodgett films, 668
Charge transfer
Photovoltaic properties of novel conjugated oligomer/n-Si(111) heterostructrues, 415
Charge–transfer complex
Possible low-temperature phase transition of Langmuir–Blodgett films of a charge–transfer complex detected by ESR, 391
Fabrication and characterization of charge-transfer complex films by a bias-voltage LB technique, 792
Charge-transfer salt
ESR properties of Langmuir–Blodgett films based on BO and behenic acid, 458
Charge-transfer salts
Recent progress in metallic Langmuir–Blodgett films based on TTF derivatives, 14
Chemical force microscopy
Force titration of amino group-terminated self-assembled monolayers of 4-aminothiophenol on gold using chemical force microscopy, 778
Chemical patterning
Molecular strings at surfaces: 'forced assembly' of bithiophene on a sulphur p(4 × 1)Ni(110) surface, 204
Chemical solution deposition
Nucleation and growth of semiconductor particles on self-assembled monolayers by chemical solution deposition, 506
Chlorine
Optical response of monolayer films of a metal-free sulfonamido-porphyrin, 315
Chloroaluminum phthalocyanine (ClAlPc)
Characterization of thin films of chloroaluminum phthalocyanine on MoS_2: HREELS, LEET and PIES study, 303
Chlorosilanes
HREELS characterization of surfaces and interfaces in self-assembled molecular monolayers, 236
Circular dichroism
Myelin model membranes on solid substrates, 627
Colloidal gold
Assembling colloidal Au nanoparticles with functionalized self-assembled monolayers, 595
Compatibility
The compatibility in binary mixed monolayer films; poly(-methyl methacrylate) and random copolymer of styrene and acrylonitrile, 42
Composite film
LB films of non-amphiphilic diacetylene-1,4(bis-(3-quinolyl)-buta-1,3-diyne (DQ), 378
Composite membrane
Ultrathin membranes for gas separation and pervaporation prepared upon electrostatic self-assembly of polyelectrolytes, 762
Condensation
A two-dimensional network of phenol–formaldehyde monolayers by the Langmuir–Blodgett technique, 486
Conducting organic thin film
Possible low-temperature phase transition of Langmuir–Blodgett films of a charge–transfer complex detected by ESR, 391
Conducting polymers
Characterization of oligothiophene films by high resolution electron energy loss spectroscopy, 252
High-resolution electron energy loss spectroscopy studies on the electronic structure of quinquethiophene (5T) and sexithiophene (6T) films, 291
Conductive Langmuir–Blodgett film
Conductive Langmuir–Blodgett films based on dialkyldimethylammonium–metal(dmit)$_2$, 443
Conductivity
Temperature-independent conductivity of Langmuir–Blodgett films of a helical polymer and its salt complex, 364
Electrical conduction in monolayers and LB films of BEDOTTF-C_{10}TCNQ/arachidic acid mixed system, 450

Langmuir–Blodgett films manipulation of regioregular poly(3-alkylthiophene)s, 469
The preparation and conductivity of LB films of a novel polymer electrolyte and its complexes with sodium triflate and eicosylamine, 473
A study on gas sensor using electrical properties of fatty acid Langmuir–Blodgett films, 612
Conical trough
Deposition of Langmuir monolayers using conical trough, 9
Conjugated oligomer
Photovoltaic properties of novel conjugated oligomer/n-Si(111) heterostructrues, 415
Contact angle measurements
Mixed silane self assembled monolayers and their in situ modification, 199
Contact angle titration
Force titration of amino group-terminated self-assembled monolayers of 4-aminothiophenol on gold using chemical force microscopy, 778
Convection
Mesoscopic patterns of molecular aggregates on solid substrates, 854
Coordination polymer
Langmuir–Blodgett layers of a coordination polymer with a bifunctional Schiff base, 495
Optical sensing of aromatic hydrocarbons using Langmuir–Blodgett films of a Schiff base co-ordination polymer, 726
Copper phthalocyanine
High-sensitivity phthalocyanine LB film gas sensor based on field effect transistors, 383
Counterion
Effects of counterions on the orientation control of photosynthetic reaction center proteins in an applied bias-voltage Langmuir–Blodgett method, 800
m-Cresol
Implications of using *m*-cresol in the Langmuir–Blodgett processing of polyaniline, 60
Cross-linking
A two-dimensional network of phenol–formaldehyde monolayers by the Langmuir–Blodgett technique, 486
Molecular photopatterning with a two-dimensional network of polymer LB films, 833
Crown ether
Study of Langmuir monolayers of crown-ether C_{60} derivatives and their interaction with different subphase ions, 141
Photosensitive and ionoselective properties of the amphipilic crown-ether dye in monolayers, 821
Cyanine
Light-induced J-aggregation in mixed Langmuir–Blodgett films of selenium-containing cyanine and azobenzene, 813
Cyanine dye
Layer-by-layer self-assembly of polyelectrolyte and water soluble cyanine dye, 748
Cyanoacrylate co-polymers
Polycyanoacrylate electron beam resists deposited by the Langmuir–Schaefer technique, 659
Cyanobiphenyl
Aggregation and orientation phenomena in constrained films of LC poly(olefin sulfone)s, 214
D-σ-A molecular rectifier
In search of D-σ-A molecular rectifiers: the D-σ-A system derived from triptycenequinone and tetrathiafulvalene, 100
Defect analysis
Analysis of defects in CdA Langmuir–Blodgett film using synchrotron X-ray radiation, 273
Degree of charge transfer
Charge-transfer interactions and non-linear optical properties of tetrathiafulvalene-based Langmuir–Blodgett films, 348
Dendritic growth
Dendritic growth strategies for construction of ultrathin organic films on solid substrate, 221
Density profile
A Monte Carlo study of bilayer formation in a lattice model, 846
Dewetting
Formation of ordered mesoscopic patterns in polymer cast films by dewetting, 829
Diacetylene
LB films of non-amphiphilic diacetylene-1,4(bis-(3-quinolyl)-buta-1,3-diyne (DQ), 378
Dialkyldimethylammonium–metal(dmit)$_2$ complex
Conductive Langmuir–Blodgett films based on dialkyldimethylammonium–metal(dmit)$_2$, 443
Dielectric properties
Calculation of the dielectric constant of monolayers with dielectric anisotropy with a consideration of molecular configuration, 395
Dielectric relaxation
Analysis of dielectric relaxation phenomena of monolayer films by monolayer compression, 228
Dielectric response
Recent progress in metallic Langmuir–Blodgett films based on TTF derivatives, 14
Differential scanning calorimetry
Phase behavior of methyl branched 1-acyl-2-alkyl-glycerophosphoethanolamines, 28
Thermally stimulated currents of Langmuir–Blodgett films, 403
Diffusion constant
Direct observation of the behavior of single macromolecules at the gas–liquid interface, 781
Diffusional exchange of matter
Interfacial relaxation of phospholipid layers at a liquid–liquid interface, 224
Diluted magnetic semiconductor
Ion irradiation effect on diluted magnetic semiconductor fine particles incorporated into Langmuir–Blodgett films, 581
Diluted magnetic semiconductor nanoparticles fabricated by the Langmuir–Blodgett technique, 586
Dimethoxy substituted poly(*p*-phenylenevinylene)s
Dipping induced orientation in Langmuir–Blodgett multilayers of a flexible PPV precursor polymer, 65
Dipalmitoylphosphatidylcholine
Interaction of DPPC monolayer at air–water interface with hydrophobic ions, 599
Dipping induced orientation
Dipping induced orientation in Langmuir–Blodgett multilayers of a flexible PPV precursor polymer, 65
Dissipative structure
Formation of ordered mesoscopic patterns in polymer cast films by dewetting, 829

DNA biosensors
DNA-containing organized molecular structure based on controlled assembly on supported monolayers, 647
DNA manipulation
DNA-containing organized molecular structure based on controlled assembly on supported monolayers, 647
DNA mimetics
Construction of two-dimensional DNA-mimetics: supramolecular architecture with highly stacked base-pairs of amphiphilic adenine and thymine at the air–water interface, 603
Domains
Molecular structure and surface order in monolayers of alkanethiols evidenced by HREELS, 156
Doping
Implications of using *m*-cresol in the Langmuir–Blodgett processing of polyaniline, 60
Dyad
The accumulation of photochromic energy acceptor species in A–S dyad Langmuir–Blodgett films, 718
Dye
Monolayers and Langmuir–Blodgett films of the electrochromic dye Di-8-ANEPPS, 804
Dye dopant
Negative-resistance device using organic-dye-doped polymer film, 545
Dynamic response
On the characterisation and gas sensing properties of Cu(II) tetra(alkylamino carbonyl) phthalocyanine LB films, 465
Elastic constant
Direct observation of the behavior of single macromolecules at the gas–liquid interface, 781
Elastic deformation
Dependence of the measured monolayer height on applied forces in scanning force microscopy, 262
Elastic modulus
Direct observation of the behavior of single macromolecules at the gas–liquid interface, 781
Electrical characterization
Gas-sensing properties of porphyrin dimer Langmuir–Blodgett films, 341
Electrical conductivity
ESR properties of Langmuir–Blodgett films based on BO and behenic acid, 458
Electrical properties
Langmuir–Blodgett films of thiol-capped gold nanoclusters: fabrication and electrical properties, 515
Electroabsorption
Charge-transfer interactions and non-linear optical properties of tetrathiafulvalene-based Langmuir–Blodgett films, 348
Electrochemical oxidation
Conductive Langmuir–Blodgett films based on dialkyldimethylammonium–metal(dmit)$_2$, 443
Electrochemistry
Langmuir–Blodgett film of hydrogenase for electrochemical hydrogen production, 639
Light emitting electrochemical devices from sequentially adsorbed multilayers of a polymeric ruthenium (II) complex and various polyanions, 663
Electrochromism
Monolayers and Langmuir–Blodgett films of the electrochromic dye Di-8-ANEPPS, 804
Electroluminescence
High frequency alternating current light-emitting diodes using Langmuir–Blodgett films, 668
Light emission from electroluminescent Langmuir–Blodgett films of a polyester derived from oligothiophene, 715
Electroluminescent device
Assembly and applications of the inorganic nanocrystals in polymer networks, 536
Electromagnetic coupling
Surface-enhanced infrared spectra of azobenzene LB monolayers on silver island film, 287
Electron beam lithography
Polycyanoacrylate electron beam resists deposited by the Langmuir–Schaefer technique, 659
Electronic transition
Growth and characterization of benzylic amide [2]catenane thin films, 321
The investigation of a localized transition of poly(*p*-phenylenevinylene), 419
Electron microscopy
Preparation of semiconductor superlattices from LB precursor, 503
Electron relay
Chemically modified electrode via layer-by-layer deposition of glucose oxidase (GOD) and polycation-bearing Os complex, 730
Electron spin resonance
Molecular orientation of octaalkoxyphthalocyanine derivatives in Langmuir–Blodgett films, 87
Possible low-temperature phase transition of Langmuir–Blodgett films of a charge–transfer complex detected by ESR, 391
ESR properties of Langmuir–Blodgett films based on BO and behenic acid, 458
Diluted magnetic semiconductor nanoparticles fabricated by the Langmuir–Blodgett technique, 586
Electron transfer
Transient fluorescence in flavin/TCNQ hetero LB film, 373
Electron transmission
The effect of molecular structure and of three-dimensional order on electron transmission through thin organic layers, 357
Electron tunneling
Langmuir–Blodgett films in the development of high temperature single electron tunneling devices, 550
Electronic absorption spectra
Molecular orientation of octaalkoxyphthalocyanine derivatives in Langmuir–Blodgett films, 87
Electrophoretic sedimentation technique
Photocurrent of bacteriorhodopsin films deposited by electrophoretic method, 698
Electroporation
Linear response of a fluctuating lipid bilayer, 796
Electrostatic
Breakdown of the Poisson-Boltzmann description for electrical double layers involving large multivalent ions, 19
Electrostatic interaction
Multilayer assemblies of colloidal ZnS doped with silver and polyelectrolytes based on electrostatic interaction, 528
Chemically modified electrode via layer-by-layer deposition of glucose oxidase (GOD) and polycation-bearing Os complex, 730

Electrostatic repulsion
Effects of counterions on the orientation control of photosynthetic reaction center proteins in an applied bias-voltage Langmuir–Blodgett method, 800
Enzymatic activity
Study of horseradish peroxidase activity in alternate-layer Langmuir–Blodgett films, 621
Enzyme electrode
Chemically modified electrode via layer-by-layer deposition of glucose oxidase (GOD) and polycation-bearing Os complex, 730
Eosin
Optical sensor with active matrix built from polyelectrolytes–smart molecules mixture, 743
Ether-ester-linkages
Specific adsorption of PLA_2 at monolayers, 616
Excess free energy of mixing
Study on microstructures of mixed monolayers of poly (octadecylacrylate) and octadecanol in relation to the retardation of water evaporation, 109
Fatty acid
Two-dimensional array of silver nanoparticles, 524
α-Fe_2O_3
Preparation of covalently modified organic–inorganic composite nanoparticles and their interfacial electron transfer researches, 563
Study on the photo-induced interfacial charge transfer in TiO_2/Fe_2O_3 heterostructured composite film, 568
Fiber-optic biosensor
Fiber-optic biosensor for the detection of organophosphorus compounds using AChE-immobilized viologen LB films, 676
Field effect transistor
High-sensitivity phthalocyanine LB film gas sensor based on field effect transistors, 383
Films
Study on the self-packing of SnO_2 nanoparticles at the air–hydrosol interface and its composite LB films with arachidic acid, 33
Fine particle
Ion irradiation effect on diluted magnetic semiconductor fine particles incorporated into Langmuir–Blodgett films, 581
First hyperpolarizability
Langmuir–Blodgett films of new sulfonyl amphiphiles containing azobenzene chromophore, 78
Flavin
Transient fluorescence in flavin/TCNQ hetero LB film, 373
Flicker noise
Linear response of a fluctuating lipid bilayer, 796
Floating layers
Inclusion phenomenon in mixed floating layers containing phthalocyanines, 104
Flow of monolayer
In-plane orientation of mesoscopic domains in Langmuir and Langmuir–Blodgett films induced by rotating disks, 24
Fluorescence
Fluorescence probes for chemical reactivity at the interface of a self-assembled monolayer, 477
Optical sensor with active matrix built from polyelectrolytes–smart molecules mixture, 743
Fluorescence decay
Transient fluorescence in flavin/TCNQ hetero LB film, 373
Fluorescence light microscopy
The role of pulmonary surfactant protein C during the breathing cycl, 632
Fluorescence microscopy
Construction of two-dimensional DNA-mimetics: supramolecular architecture with highly stacked base-pairs of amphiphilic adenine and thymine at the air–water interface, 603
Force titration
Force titration of amino group-terminated self-assembled monolayers of 4-aminothiophenol on gold using chemical force microscopy, 778
Forced assembly
Molecular strings at surfaces: 'forced assembly' of bithiophene on a sulphur p(4 × 1)Ni(110) surface, 204
Formamide/water subphase
Spin-crossover complex stabilized on a formamide/water subphase, 435
Formic acid
The effect of the structure of ice on the aggregation state of coadsorbed formic acid, 499
Fourier transform infrared spectroscopy
Optimum IR measurement conditions for thin layers on dielectric surfaces, 283
Characterization of 16-mer polyaniline composite Langmuir–Blodgett films, 576
Characterization of Langmuir–Blodgett films of *N,N*-dioctadecyl-*p*-nitrophenylaniline mixed with arachidic acid, 607
Myelin model membranes on solid substrates, 627
Fractal immittance
Power-law conductivity in merocyanine LB films, 387
Frequency response
High frequency alternating current light-emitting diodes using Langmuir–Blodgett films, 668
FTIR spectroscopy of rhodopsin
Langmuir–Blodgett films of rhodopsin: an infrared spectroscopic study, 118
Fullerene
Study of Langmuir monolayers of crown-ether C_{60} derivatives and their interaction with different subphase ions, 141
Molecular sifter using space controlled Langmuir–Blodgett films by fullerene molecules, 655
Fullerene derivatives
Stable monolayers of fullerene derivatives, 96
Functionalized azobenzene
Effect of the molecular interaction on molecular packing and orientation in azobenzene-functionalized self-assembled monolayers on gold, 195
Gas sensor
Gas-sensing properties of porphyrin dimer Langmuir–Blodgett films, 341
High-sensitivity phthalocyanine LB film gas sensor based on field effect transistors, 383
A study on gas sensor using electrical properties of fatty acid Langmuir–Blodgett films, 612
Molecular sifter using space controlled Langmuir–Blodgett films by fullerene molecules, 655
Gas separation
Ultrathin membranes for gas separation and pervaporation pre-

pared upon electrostatic self-assembly of polyelectrolytes, 762
Gas–water interface
In-plane orientation of pyrrole derivatives bearing a side-on liquid crystal group, 1
Genetic algorithm
Analysis of defects in CdA Langmuir–Blodgett film using synchrotron X-ray radiation, 273
Glucose oxidase
Chemically modified electrode via layer-by-layer deposition of glucose oxidase (GOD) and polycation-bearing Os complex, 730
Gold
Structure of SAMs generated from functionalized thiols on gold, 150
Fabrication of colloidal gold micro-patterns using photolithographed self-assembled monolayers as templates, 176
Gold nanoparticles
Langmuir–Blodgett films of thiol-capped gold nanoclusters: fabrication and electrical properties, 515
Gold nanoparticulate film bound to silicon surface with self-assembled monolayers, 591
Graphite
Characterization of ultrathin films of titanyl phthalocyanine on graphite: PIES and UPS study, 278
Grazing incidence X-ray diffraction
Influence of head group methylation on the phase behavior of lipid monolayers, 256
Growth condition
Ultrathin multilayers made by alternate deposition of ionenes and polyvinylsulfate: from unstable to stable growth, 734
Guided wave excitation mode
Evaluation of liquid crystal molecules on polyimide LB films using attenuated total reflection measurement, 353
H-band
Control of aggregate formation in merocyanine Langmuir–Blodgett films, 345
Head group methylation
Influence of head group methylation on the phase behavior of lipid monolayers, 256
Heterostructure
Heterostructure of silicon/organized-polymer-film with varied liquid crystalline states: a photovoltaic study, 412
Photovoltaic properties of novel conjugated oligomer/n-Si(111) heterostructrues, 415
Heterstructured composite film
Study on the photo-induced interfacial charge transfer in TiO_2/Fe_2O_3 heterostructured composite film, 568
Hexadecylquinolinium tricyanoquinodimethanide
Observation of unimolecular electrical rectification in hexadecylquinolinium tricyanoquinodimethanide, 326
Hierarchic structure
Mesoscopic patterns of molecular aggregates on solid substrates, 854
High resolution electron energy loss spectroscopy
Molecular structure and surface order in monolayers of alkanethiols evidenced by HREELS, 156
Characterization of oligothiophene films by high resolution electron energy loss spectroscopy, 252
HREELS characterization of surfaces and interfaces in self-assembled molecular monolayers, 236
High-resolution electron energy loss spectroscopy studies on the electronic structure of quinquethiophene (5T) and sexithiophene (6T) films, 291
Characterization of thin films of chloroaluminum phthalocyanine on MoS_2: HREELS, LEET and PIES study, 303
Homeotropic alignment
Aggregation and orientation phenomena in constrained films of LC poly(olefin sulfone)s, 214
Alignment of nematic liquid crystals on mixed Langmuir–Blodgett monolayers, 681
Honeycomb structure
Mesoscopic patterns of molecular aggregates on solid substrates, 854
Horseradish peroxidase
Study of horseradish peroxidase activity in alternate-layer Langmuir–Blodgett films, 621
Hydration
Hydration and removal of supported phospholipid films in aqueous surfactant solutions, 247
Hydration number
Hydration number of calcium palmitate LB film deposited on a piezoelectric quartz crystal plate, 722
Hydrogen
Langmuir–Blodgett film of hydrogenase for electrochemical hydrogen production, 639
Hydrogenase
Langmuir–Blodgett film of hydrogenase for electrochemical hydrogen production, 639
Hydrogen bonds
Monolayer studies of methyl *vic*-dihydroxyoctadecanoates, 180
Hydrophobic effect
Surfactant monolayers at solid–liquid interfaces: conformation and interaction, 161
Hydrophobic ions
Interaction of DPPC monolayer at air–water interface with hydrophobic ions, 599
Hydrophobic polymer
Formation of ordered mesoscopic patterns in polymer cast films by dewetting, 829
Hydrosol
Study on the self-packing of SnO_2 nanoparticles at the air–hydrosol interface and its composite LB films with arachidic acid, 33
Ice coverage
The effect of the structure of ice on the aggregation state of co-adsorbed formic acid, 499
Image extraction
Photoreceptor composed of spiropyran–TCNQ films for image extraction, 703
Immobilization
In situ quartz crystal microbalance monitoring of Fab′-fragment binding to linker lipids in a phosphatidylcholine monolayer matrix. Application to immunosensors, 643
Immunoreaction
In situ quartz crystal microbalance monitoring of Fab′-fragment binding to linker lipids in a phosphatidylcholine monolayer matrix. Application to immunosensors, 643
Impedance spectroscopy
The electrical characterization of supported phospholipid bilayers using titanium/titanium oxide microelectrodes, 758

Impurity effects
Spreading concentration effect on the morphology of phospholipid monolayers, 84
Infrared absorption spectroscopy
Possible low-temperature phase transition of Langmuir–Blodgett films of a charge–transfer complex detected by ESR, 391
Infrared dichroism
In-plane orientation of mesoscopic domains in Langmuir and Langmuir–Blodgett films induced by rotating disks, 24
Polyoxometalates in Langmuir–Blodgett films: toward new magnetic materials, 439
Infrared external reflectance spectroscopy
Infrared spectroscopy of aqueous biophysical monolayers, 308
Infrared spectra
Recent progress in metallic Langmuir–Blodgett films based on TTF derivatives, 14
Infrared spectrometry
Spin-crossover complex stabilized on a formamide/water subphase, 435
Inorganic–organic alternating film
Preparation and structure of quantum-sized cadmium sulfide grown in amphiphilic oligomer Langmuir–Blodgett films, 408
Inorganic semiconductor nanocrystals
Assembly and applications of the inorganic nanocrystals in polymer networks, 536
In-plane conductivity
Conductive Langmuir–Blodgett films based on dialkyldimethylammonium–metal(dmit)$_2$, 443
In-plane orientation
In-plane orientation of mesoscopic domains in Langmuir and Langmuir–Blodgett films induced by rotating disks, 24
Intercalation
Construction of two-dimensional DNA-mimetics: supramolecular architecture with highly stacked base-pairs of amphiphilic adenine and thymine at the air–water interface, 603
Interface
Fluorescence probes for chemical reactivity at the interface of a self-assembled monolayer, 477
Interfaces
HREELS characterization of surfaces and interfaces in self-assembled molecular monolayers, 236
Interface sensitivity
Second-harmonic imaging of surface order and symmetry, 241
Interfacial charge transfer
Study on the photo-induced interfacial charge transfer in TiO_2/Fe_2O_3 heterostructured composite film, 568
Interfacial electron transfer
Preparation of covalently modified organic–inorganic composite nanoparticles and their interfacial electron transfer researches, 563
Interfacial relaxation
Interfacial relaxation of phospholipid layers at a liquid–liquid interface, 224
Ion complexation
Complexation of metal ions with Langmuir–Blodgett films of novel calixarene azo-derivative, 686
Ionic conduction
Thermally stimulated currents and electrical conduction in self-assembled ultrathin films, 209
Ionic space charge polarization
Thermally stimulated currents and electrical conduction in self-assembled ultrathin films, 209
Ion irradiation
Ion irradiation effect on diluted magnetic semiconductor fine particles incorporated into Langmuir–Blodgett films, 581
Ion–monolayer interaction
Interaction of DPPC monolayer at air–water interface with hydrophobic ions, 599
Ionoselective properties
Photosensitive and ionoselective properties of the amphipilic crown-ether dye in monolayers, 821
Iron(II) complex
Spin-crossover complex stabilized on a formamide/water subphase, 435
Iron oxide–hydroxide
Growth of FeO(OH) crystals on self-assembled monolayers on gold, 571
Isosbestic point
Adsorption isotherms of poly(*o*-methoxyaniline), 739
Isotherm
Langmuir monolayers of polydimethylsiloxane with controllable surface potential, 816
π–*A* isotherms
Monolayer studies of methyl *vic*-dihydroxyoctadecanoates, 180
The formation of J-aggregates in mutual mixing merocyanine dyes LB films, 446
Competition of interactions in monolayers of amphiphilic acid amides at the air–water interface, 857
J-aggregate
The formation of J-aggregates in mutual mixing merocyanine dyes LB films, 446
Layer-by-layer self-assembly of polyelectrolyte and water soluble cyanine dye, 748
Light-induced J-aggregation in mixed Langmuir–Blodgett films of selenium-containing cyanine and azobenzene, 813
Langmuir–Blodgett
Optical response of monolayer films of a metal-free sulfonamido-porphyrin, 315
Observation of unimolecular electrical rectification in hexadecylquinolinium tricyanoquinodimethanide, 326
Organic/inorganic Langmuir–Blodgett films based on known layered solids: divalent and trivalent metal phosphonates, 331
Cd^{2+} and Mn^{2+} incorporation in copolysiloxane/eicosylamine alternate layer LB films: influence on pyroelectric activity, 369
A comment upon the second-order non-linear optical properties of 2,4-bis(*N*-octadecylpyrrol-2-yl)squaraine, 461
Langmuir–Blodgett layers of a coordination polymer with a bifunctional Schiff base, 495
Myelin model membranes on solid substrates, 627
Nanometer-scale lithography of the Langmuir–Blodgett films with atomic force microscope, 690
Langmuir–Blodgett bilayers
Effect of substrate anchoring on the mechanical strength of Langmuir–Blodgett bilayers, 772
Langmuir–Blodgett films of new sulfonyl amphiphiles containing azobenzene chromophore, 78
Langmuir–Blodgett films

In-plane orientation of pyrrole derivatives bearing a side-on liquid crystal group, 1
Deposition of Langmuir monolayers using conical trough, 9
In-plane orientation of mesoscopic domains in Langmuir and Langmuir–Blodgett films induced by rotating disks, 24
Lipopeptides of myelin basic protein in mono- and multilayers, 37
Preparation and characterization of composite LB films of lignin and cadmium stearate, 47
Effect of pH on acetylcholinesterase Langmuir and Langmuir–Blodgett films studied by surface potential and atomic force microscopy, 56
Dipping induced orientation in Langmuir–Blodgett multilayers of a flexible PPV precursor polymer, 65
Study of spontaneous insertion of non-ionic surfactant Triton X-100 into phospholipid monolayers, 69
Molecular orientation of octaalkoxyphthalocyanine derivatives in Langmuir–Blodgett films, 87
Stable monolayers of fullerene derivatives, 96
Composite Langmuir–Blodgett films containing polypyrrole and polyimide, 127
Organic/inorganic Langmuir–Blodgett films based on metal phosphonates 2: zirconium phosphonate-based alternating layer films, 131
Novel nitroso-compounds Langmuir–Blodgett films, 136
Molecular property related silver decoration on fatty acid Langmuir–Blodgett monolayers, 268
Analysis of defects in CdA Langmuir–Blodgett film using synchrotron X-ray radiation, 273
Structures and defects in Langmuir–Blodgett films, 295
Monolayers and Langmuir–Blodgett multilayers of urethane-substituted diacetylene polymers with different molecular weight, 336
Temperature-independent conductivity of Langmuir–Blodgett films of a helical polymer and its salt complex, 364
Transient fluorescence in flavin/TCNQ hetero LB film, 373
LB films of non-amphiphilic diacetylene-1,4(bis-(3-quinolyl)-buta-1,3-diyne (DQ), 378
High-sensitivity phthalocyanine LB film gas sensor based on field effect transistors, 383
Possible low-temperature phase transition of Langmuir–Blodgett films of a charge–transfer complex detected by ESR, 391
Negative photoelectrical properties of adsorption Langmuir–Blodgett films, 399
Thermally stimulated currents of Langmuir–Blodgett films, 403
Photoinduced properties of liquid crystalline azobenzene polymer in Langmuir–Blodgett films investigated by surface plasmon resonance, 427
The temporal and thermal stability of pyroelectric calix[8]arene Langmuir–Blodgett films, 431
Spin-crossover complex stabilized on a formamide/water subphase, 435
Polyoxometalates in Langmuir–Blodgett films: toward new magnetic materials, 439
Electrical conduction in monolayers and LB films of BED-OTTF-C_{10}TCNQ/arachidic acid mixed system, 450
Fabrication of chiral poly(thiophene) Langmuir–Blodgett films, 454
ESR properties of Langmuir–Blodgett films based on BO and behenic acid, 458
On the characterisation and gas sensing properties of Cu(II) tetra(alkylamino carbonyl) phthalocyanine LB films, 465
Langmuir–Blodgett films manipulation of regioregular poly(3-alkylthiophene)s, 469
The preparation and conductivity of LB films of a novel polymer electrolyte and its complexes with sodium triflate and eicosylamine, 473
A two-dimensional network of phenol–formaldehyde monolayers by the Langmuir–Blodgett technique, 486
Complex formation between amphiphilic organic ligands and transition metal ions in monolayers and LB multilayers, 491
Size-quantization in extremely small CdS clusters formed in calixarene LB films, 510
Langmuir–Blodgett films of thiol-capped gold nanoclusters: fabrication and electrical properties, 515
Preparation and characterization of Langmuir monolayers and Langmuir–Blodgett films of nanosized Au_{55}-clusters, 520
SFM and SEM investigation of CdS layers from Langmuir–Blodgett film templates, 532
FTIR and UV-vis spectroscopy studies of Langmuir–Blodgett films of stearic acid/γ-Fe_2O_3 nanoparticles, 541
Langmuir–Blodgett films in the development of high temperature single electron tunneling devices, 550
Characterization of 16-mer polyaniline composite Langmuir–Blodgett films, 576
Ion irradiation effect on diluted magnetic semiconductor fine particles incorporated into Langmuir–Blodgett films, 581
Structure and characterization of surfactant-capped CdS nanoparticle films by the Langmuir–Blodgett technique, 559
Characterization of Langmuir–Blodgett films of *N,N*-dioctadecyl-*p*-nitrophenylaniline mixed with arachidic acid, 607
A study on gas sensor using electrical properties of fatty acid Langmuir–Blodgett films, 612
Langmuir–Blodgett film of hydrogenase for electrochemical hydrogen production, 639
Temperature dependence of current transport in palladium/LB-film/silicon diodes, 652
Molecular sifter using space controlled Langmuir–Blodgett films by fullerene molecules, 655
High frequency alternating current light-emitting diodes using Langmuir–Blodgett films, 668
Complexation of metal ions with Langmuir–Blodgett films of novel calixarene azo-derivative, 686
Photoinduced electron transfer in a MIM device composed of ferrocene-flavin-viologen-TCNQ molecular heterojunctions, 671
Fiber-optic biosensor for the detection of organophosphorus compounds using AChE-immobilized viologen LB films, 676
Photocurrent of bacteriorhodopsin films deposited by electrophoretic method, 698
Photoreceptor composed of spiropyran–TCNQ films for image extraction, 703
The effect of addition of second donor layer on charge separation in LB films, 708
Light-emitting diodes from dye-insulating matrix Langmuir–Blodgett films, 712
Light emission from electroluminescent Langmuir–Blodgett films of a polyester derived from oligothiophene, 715
The accumulation of photochromic energy acceptor species in A–S dyad Langmuir–Blodgett films, 718

Hydration number of calcium palmitate LB film deposited on a piezoelectric quartz crystal plate, 722
Optical sensing of aromatic hydrocarbons using Langmuir–Blodgett films of a Schiff base co-ordination polymer, 726
Layer-by-layer self-assembly of polyelectrolyte and water soluble cyanine dye, 748
Direct observation of the behavior of single macromolecules at the gas–liquid interface, 781
Fabrication and characterization of charge-transfer complex films by a bias-voltage LB technique, 792
Effects of counterions on the orientation control of photosynthetic reaction center proteins in an applied bias-voltage Langmuir–Blodgett method, 800
Monolayers and Langmuir–Blodgett films of the electrochromic dye Di-8-ANEPPS, 804
A study on X-ray irradiation of composite polyaniline LB films, 808
Light-induced J-aggregation in mixed Langmuir–Blodgett films of selenium-containing cyanine and azobenzene, 813
Tobacco mosaic virus adsorption on self-assembled and Langmuir–Blodgett monolayers studied by TIRF and SFM, 824
Molecular photopatterning with a two-dimensional network of polymer LB films, 833
Phase separation of mixed LB films containing spin probe molecules, 837

Langmuir–Blodgett–Kuhn
High glass transition temperature syndioregic second-order non-linear optical polymer in Langmuir–Blodgett–Kuhn films, 5

Langmuir–Blodgett monolayer
Dependence of the measured monolayer height on applied forces in scanning force microscopy, 262
Surface-enhanced infrared spectra of azobenzene LB monolayers on silver island film, 287
Alignment of nematic liquid crystals on mixed Langmuir–Blodgett monolayers, 681

Langmuir–Blodgett films of rhodopsin
Langmuir–Blodgett films of rhodopsin: an infrared spectroscopic study, 118

Langmuir–Blodgett precursor
Preparation of semiconductor superlattices from LB precursor, 503

Langmuir–Blodgett processing
Implications of using *m*-cresol in the Langmuir–Blodgett processing of polyaniline, 60

Langmuir–Blodgett technique
Preparation and structure of quantum-sized cadmium sulfide grown in amphiphilic oligomer Langmuir–Blodgett films, 408
Diluted magnetic semiconductor nanoparticles fabricated by the Langmuir–Blodgett technique, 586
SAW gas detection using Langmuir–Blodgett polypyrrole films, 694

Langmuir film (monolayer)
Monolayer properties of alkylammonium perfluoroalkanoates on concentrated sodium chloride solution, 123

Langmuir films
Breakdown of the Poisson-Boltzmann description for electrical double layers involving large multivalent ions, 19
Inclusion phenomenon in mixed floating layers containing phthalocyanines, 104
Kinetics of self-assembled silane monolayers at various temperatures: evidence of 2D foam, 166

Langmuir layer
Analysis of dielectric relaxation phenomena of monolayer films by monolayer compression, 228

Langmuir monolayer
Study of Langmuir monolayers of crown-ether C_{60} derivatives and their interaction with different subphase ions, 141
Langmuir monolayers of polydimethylsiloxane with controllable surface potential, 816

Langmuir–Schaefer (LS) technique
Polycyanoacrylate electron beam resists deposited by the Langmuir–Schaefer technique, 659

Lateral charge diffusion
The effect of addition of second donor layer on charge separation in LB films, 708

Layer-by-layer adsorption
Ultrathin membranes for gas separation and pervaporation prepared upon electrostatic self-assembly of polyelectrolytes, 762

Layered solid
Organic/inorganic Langmuir–Blodgett films based on known layered solids: divalent and trivalent metal phosphonates, 331

Layered structure
Aggregation and orientation phenomena in constrained films of LC poly(olefin sulfone)s, 214

Light-emitting devices
High frequency alternating current light-emitting diodes using Langmuir–Blodgett films, 668

Light-emitting diode
Light-emitting diodes from dye-insulating matrix Langmuir–Blodgett films, 712

Light-sensitive films
Langmuir–Blodgett films of rhodopsin: an infrared spectroscopic study, 118

Lignin
Preparation and characterization of composite LB films of lignin and cadmium stearate, 47

Lipid bilayer
Linear response of a fluctuating lipid bilayer, 796

Lipid monolayer
The role of pulmonary surfactant protein C during the breathing cycle, 632

Lipopeptides
Lipopeptides of myelin basic protein in mono- and multilayers, 37

Liquid crystal
Investigation of dielectric relaxation phenomena in liquid crystal monolayer at the air–water interface, 232
Photoinduced properties of liquid crystalline azobenzene polymer in Langmuir–Blodgett films investigated by surface plasmon resonance, 427

Liquid crystalline polymer
Mesogenic structural effects on monolayer behaviors of the liquid crystalline polysiloxanes at the air/water interface, 145
Aggregation and orientation phenomena in constrained films of LC poly(olefin sulfone)s, 214
Heterostructure of silicon/organized-polymer-film with varied liquid crystalline states: a photovoltaic study, 412

Liquid–liquid interface
Interfacial relaxation of phospholipid layers at a liquid–liquid interface, 224
Lithium
Temperature-independent conductivity of Langmuir–Blodgett films of a helical polymer and its salt complex, 364
Lithography
Nanometer-scale lithography of the Langmuir–Blodgett films with atomic force microscope, 690
Local state
The investigation of a localized transition of poly(*p*-phenylenevinylene), 419
Long-chain alkanoic acids
An electrochemical study of the changes in the passivation of an aluminum alloy surface induced by the presence of a self-assembled monolayer, 481
Long-chain pyridylazo dye
Complex formation between amphiphilic organic ligands and transition metal ions in monolayers and LB multilayers, 491
Long-chain thiazolylazo dye
Complex formation between amphiphilic organic ligands and transition metal ions in monolayers and LB multilayers, 491
Low-energy electron transmission spectroscopy (LEET)
Characterization of thin films of chloroaluminum phthalocyanine on MoS_2: HREELS, LEET and PIES study, 303
Luminescence enhancement
Multilayer assemblies of colloidal ZnS doped with silver and polyelectrolytes based on electrostatic interaction, 528
Luminescence
Ion irradiation effect on diluted magnetic semiconductor fine particles incorporated into Langmuir–Blodgett films, 581
Lyotropic mesophases
Phase behavior of methyl branched 1-acyl-2-alkyl-glycerophosphoethanolamines, 28
Maxwell displacement current
Analysis of dielectric relaxation phenomena of monolayer films by monolayer compression, 228
Investigation of dielectric relaxation phenomena in liquid crystal monolayer at the air–water interface, 232
Membrane insertion
Study of spontaneous insertion of non-ionic surfactant Triton X-100 into phospholipid monolayers, 69
Membranes
Myelin model membranes on solid substrates, 627
p-Mercaptopyridine
Assembling colloidal Au nanoparticles with functionalized self-assembled monolayers, 595
Merocyanine dye
Control of aggregate formation in merocyanine Langmuir–Blodgett films, 345
Power-law conductivity in merocyanine LB films, 387
Negative photoelectrical properties of adsorption Langmuir–Blodgett films, 399
The formation of J-aggregates in mutual mixing merocyanine dyes LB films, 446
Mesogenic unit
Mesogenic structural effects on monolayer behaviors of the liquid crystalline polysiloxanes at the air/water interface, 145
Mesoscopic pattern
Formation of ordered mesoscopic patterns in polymer cast films by dewetting, 829
Metal complex
Novel nitroso-compounds Langmuir–Blodgett films, 136
Complex formation between amphiphilic organic ligands and transition metal ions in monolayers and LB multilayers, 491
Metal ions
Cd^{2+} and Mn^{2+} incorporation in copolysiloxane/eicosylamine alternate layer LB films: influence on pyroelectric activity, 369
Metal$(dmit)_2$ anion
Conductive Langmuir–Blodgett films based on dialkyldimethylammonium–metal$(dmit)_2$, 443
Metal/insulator/metal device
Photoinduced electron transfer in a MIM device composed of ferrocene-flavin-viologen-TCNQ molecular heterojunctions, 671
Metallic Langmuir–Blodgett films
Recent progress in metallic Langmuir–Blodgett films based on TTF derivatives, 14
Metallization
Fabrication of colloidal gold micro-patterns using photolithographed self-assembled monolayers as templates, 176
Methyl *vic*-dihydroxyoctadecanoate
Monolayer studies of methyl *vic*-dihydroxyoctadecanoates, 180
Michael addition
Dendritic growth strategies for construction of ultrathin organic films on solid substrate, 221
Mixed Langmuir–Blodgett film
Power-law conductivity in merocyanine LB films, 387
Mixed monolayer
Alignment of nematic liquid crystals on mixed Langmuir–Blodgett monolayers, 681
Study on microstructures of mixed monolayers of poly (octadecylacrylate) and octadecanol in relation to the retardation of water evaporation, 109
Mixed self assembled monolayer
Mixed silane self assembled monolayers and their in situ modification, 199
Mixed-model system
Infrared spectroscopy of aqueous biophysical monolayers, 308
Modified ZnS colloids
Multilayer assemblies of colloidal ZnS doped with silver and polyelectrolytes based on electrostatic interaction, 528
Molecular aggregation
Inclusion phenomenon in mixed floating layers containing phthalocyanines, 104
Molecular clusters
Langmuir–Blodgett films in the development of high temperature single electron tunneling devices, 550
Molecular electronics
Electrical conduction in monolayers and LB films of BEDOTTF-C_{10}TCNQ/arachidic acid mixed system, 450
Molecular inclusion
Inclusion phenomenon in mixed floating layers containing phthalocyanines, 104
Molecular interaction
Effect of the molecular interaction on molecular packing and

orientation in azobenzene-functionalized self-assembled monolayers on gold, 195
A Monte Carlo study of bilayer formation in a lattice model, 846
Molecular orientation
Effect of the molecular interaction on molecular packing and orientation in azobenzene-functionalized self-assembled monolayers on gold, 195
Characterization of thin films of chloroaluminum phthalocyanine on MoS_2: HREELS, LEET and PIES study, 303
Molecular packing
Variation of monolayer behaviour and molecular packing in zinc arachidate LB films with subphase pH, 787
Molecular packing density
Effect of the molecular interaction on molecular packing and orientation in azobenzene-functionalized self-assembled monolayers on gold, 195
Molecular photodiode
Photoinduced electron transfer in a MIM device composed of ferrocene-flavin-viologen-TCNQ molecular heterojunctions, 671
Molecular sifter
Molecular sifter using space controlled Langmuir–Blodgett films by fullerene molecules, 655
Molecular structure
Molecular structure and surface order in monolayers of alkanethiols evidenced by HREELS, 156
Molecular switch
Photoinduced properties of liquid crystalline azobenzene polymer in Langmuir–Blodgett films investigated by surface plasmon resonance, 427
Molecular wire
Direct observation of the behavior of single macromolecules at the gas–liquid interface, 781
Monolayer
Phase behavior of methyl branched 1-acyl-2-alkyl-glycerophosphoethanolamines, 28
Lipopeptides of myelin basic protein in mono- and multilayers, 37
The compatibility in binary mixed monolayer films; poly(-methyl methacrylate) and random copolymer of styrene and acrylonitrile, 42
An X-ray reflectivity study of monolayers and bilayers of archae lipids on a solid substrate, 52
Dipping induced orientation in Langmuir–Blodgett multilayers of a flexible PPV precursor polymer, 65
Monolayer properties of amphiphilic tetrakis(phenylethynyl)-benzene compounds, 74
Stable monolayers of fullerene derivatives, 96
Monolayer assembly of long-chain histidine derivative for arrangement of cytochrome *C* molecules, 113
Mesogenic structural effects on monolayer behaviors of the liquid crystalline polysiloxanes at the air/water interface, 145
Structure of SAMs generated from functionalized thiols on gold, 150
Molecular structure and surface order in monolayers of alkanethiols evidenced by HREELS, 156
Kinetics of self-assembled silane monolayers at various temperatures: evidence of 2D foam, 166
Monolayers and Langmuir–Blodgett multilayers of urethane-substituted diacetylene polymers with different molecular weight, 336
LB films of non-amphiphilic diacetylene-1,4(bis-(3-quinolyl)-buta-1,3-diyne (DQ), 378
Calculation of the dielectric constant of monolayers with dielectric anisotropy with a consideration of molecular configuration, 395
Electrical conduction in monolayers and LB films of BED-OTTF-C_{10}TCNQ/arachidic acid mixed system, 450
A two-dimensional network of phenol–formaldehyde monolayers by the Langmuir–Blodgett technique, 486
Langmuir–Blodgett layers of a coordination polymer with a bifunctional Schiff base, 495
Langmuir–Blodgett films of thiol-capped gold nanoclusters: fabrication and electrical properties, 515
Myelin model membranes on solid substrates, 627
In situ quartz crystal microbalance monitoring of Fab′-fragment binding to linker lipids in a phosphatidylcholine monolayer matrix. Application to immunosensors, 643
Self-assembled mono- and multilayers of monodisperse cationic and anionic latex particles, 752
Variation of monolayer behaviour and molecular packing in zinc arachidate LB films with subphase pH, 787
Monolayers and Langmuir–Blodgett films of the electrochromic dye Di-8-ANEPPS, 804
Photosensitive and ionoselective properties of the amphipilic crown-ether dye in monolayers, 821
Competition of interactions in monolayers of amphiphilic acid amides at the air–water interface, 857
Monolayer assembly
Modulation of second harmonic generation properties of tolan and stilbene derivatives by monolayer assembling, 423
Monolayer at the air–water interface
Investigation of dielectric relaxation phenomena in liquid crystal monolayer at the air–water interface, 232
Monolayer behavior
Preparation and characterization of Langmuir monolayers and Langmuir–Blodgett films of nanosized Au_{55}-clusters, 520
Monolayer compression
Investigation of dielectric relaxation phenomena in liquid crystal monolayer at the air–water interface, 232
Monolayer deposition
Deposition of Langmuir monolayers using conical trough, 9
Monolayer properties
Monolayer properties of amphiphilic molecules supported on nano-rough surfaces: a Monte Carlo study, 850
Monolayer reaction
Formation of tethered supported bilayers via membrane-inserting reactive lipids, 767
Monolayers and dielectric surfaces
Optimum IR measurement conditions for thin layers on dielectric surfaces, 283
Monolayer structure
Spreading concentration effect on the morphology of phospholipid monolayers, 84
Specific adsorption of PLA_2 at monolayers, 616
Monte Carlo simulation
Analysis of defects in CdA Langmuir–Blodgett film using synchrotron X-ray radiation, 273
Monolayer properties of amphiphilic molecules supported on nano-rough surfaces: a Monte Carlo study, 850

Monte Carlo technique
A Monte Carlo study of bilayer formation in a lattice model, 846
Morphology characterization
Surface-enhanced infrared spectra of azobenzene LB monolayers on silver island film, 287
Multilayer
High glass transition temperature syndioregic second-order non-linear optical polymer in Langmuir–Blodgett–Kuhn films, 5
Light emitting electrochemical devices from sequentially adsorbed multilayers of a polymeric ruthenium (II) complex and various polyanions, 663
Hydration number of calcium palmitate LB film deposited on a piezoelectric quartz crystal plate, 722
Self-assembled mono- and multilayers of monodisperse cationic and anionic latex particles, 752
Multiple sclerosis
Myelin model membranes on solid substrates, 627
Mutual mixing effect
The formation of J-aggregates in mutual mixing merocyanine dyes LB films, 446
Myelin basic protein
Lipopeptides of myelin basic protein in mono- and multilayers, 37
Myelin model membranes on solid substrates, 627
Myelin sheath
Myelin model membranes on solid substrates, 627
Nanocomposite particles
Preparation of covalently modified organic–inorganic composite nanoparticles and their interfacial electron transfer researches, 563
Nanoparticle
Preparation of semiconductor superlattices from LB precursor, 503
Size-quantization in extremely small CdS clusters formed in calixarene LB films, 510
Two-dimensional array of silver nanoparticles, 524
Langmuir–Blodgett films in the development of high temperature single electron tunneling devices, 550
Diluted magnetic semiconductor nanoparticles fabricated by the Langmuir–Blodgett technique, 586
Assembling colloidal Au nanoparticles with functionalized self-assembled monolayers, 595
Nanoparticulate films
Assembling colloidal Au nanoparticles with functionalized self-assembled monolayers, 595
Nanosize dot
Formation of ordered mesoscopic patterns in polymer cast films by dewetting, 829
Nanosized Au_{55}-clusters
Preparation and characterization of Langmuir monolayers and Langmuir–Blodgett films of nanosized Au_{55}-clusters, 520
Negative resistance
Negative-resistance device using organic-dye-doped polymer film, 545
Negative resists
Polycyanoacrylate electron beam resists deposited by the Langmuir–Schaefer technique, 659
Nematic liquid crystal
Evaluation of liquid crystal molecules on polyimide LB films using attenuated total reflection measurement, 353
Alignment of nematic liquid crystals on mixed Langmuir–Blodgett monolayers, 681
Network
A two-dimensional network of phenol–formaldehyde monolayers by the Langmuir–Blodgett technique, 486
Neutron reflectivity
Myelin model membranes on solid substrates, 627
Nitrogen oxide sensor
Gas-sensing properties of porphyrin dimer Langmuir–Blodgett films, 341
Nitroso compounds
Novel nitroso-compounds Langmuir–Blodgett films, 136
Noncollinear geometry
Second-harmonic imaging of surface order and symmetry, 241
Non-linear optical materials
A novel supramolecular self-assembly thin film with spontaneous polar order, 172
Nonlinear optics
Charge-transfer interactions and non-linear optical properties of tetrathiafulvalene-based Langmuir–Blodgett films, 348
Nucleation and growth
Nucleation and growth of semiconductor particles on self-assembled monolayers by chemical solution deposition, 506
Octadecanol
Study on microstructures of mixed monolayers of poly (octadecylacrylate) and octadecanol in relation to the retardation of water evaporation, 109
Octadecylchlorosilane
Atomic force microscopic studies on the growth of self-assembled monolayers on $SrTiO_3$-surfaces, 185
Octadecylphosphonate
Organic/inorganic Langmuir–Blodgett films based on known layered solids: divalent and trivalent metal phosphonates, 331
Oligomer
Preparation and structure of quantum-sized cadmium sulfide grown in amphiphilic oligomer Langmuir–Blodgett films, 408
Structure and characterization of surfactant-capped CdS nanoparticle films by the Langmuir–Blodgett technique, 559
Optic sensor
Optical sensor with active matrix built from polyelectrolytes–smart molecules mixture, 743
Optical contrast
Molecular property related silver decoration on fatty acid Langmuir–Blodgett monolayers, 268
Optically active unit
Fabrication of chiral poly(thiophene) Langmuir–Blodgett films, 454
Optrode
Optical sensor with active matrix built from polyelectrolytes–smart molecules mixture, 743
Order
Molecular structure and surface order in monolayers of alkanethiols evidenced by HREELS, 156
Ordered pattern
Mesoscopic patterns of molecular aggregates on solid substrates, 854
Organic gases
A study on gas sensor using electrical properties of fatty acid Langmuir–Blodgett films, 612

Organic layers
The effect of molecular structure and of three-dimensional order on electron transmission through thin organic layers, 357
Organic molecules
Molecular strings at surfaces: 'forced assembly' of bithiophene on a sulphur p(4 × 1)Ni(110) surface, 204
Organic thin film
Characterization of ultrathin films of titanyl phthalocyanine on graphite: PIES and UPS study, 278
Organic-dye-doped polymer
Negative-resistance device using organic-dye-doped polymer film, 545
Organized organic thin films
The effect of the structure of ice on the aggregation state of co-adsorbed formic acid, 499
Organophosphonate
Organic/inorganic Langmuir–Blodgett films based on known layered solids: divalent and trivalent metal phosphonates, 331
Organophosphorus compound
Fiber-optic biosensor for the detection of organophosphorus compounds using AChE-immobilized viologen LB films, 676
OTiPc
Characterization of ultrathin films of titanyl phthalocyanine on graphite: PIES and UPS study, 278
Palladium
Temperature dependence of current transport in palladium/LB-film/silicon diodes, 652
Particle–matrix composites
Nucleation and growth of semiconductor particles on self-assembled monolayers by chemical solution deposition, 506
Peak current
Negative-resistance device using organic-dye-doped polymer film, 545
Penning ionization electron spectroscopy (PIES)
Characterization of thin films of chloroaluminum phthalocyanine on MoS_2: HREELS, LEET and PIES study, 303
Penning ionization electron spectroscopy
Characterization of ultrathin films of titanyl phthalocyanine on graphite: PIES and UPS study, 278
Persistence length
Direct observation of the behavior of single macromolecules at the gas–liquid interface, 781
Pervaporation
Ultrathin membranes for gas separation and pervaporation prepared upon electrostatic self-assembly of polyelectrolytes, 762
pH sensor
Optical sensor with active matrix built from polyelectrolytes–smart molecules mixture, 743
Phase separation
Phase separation of mixed LB films containing spin probe molecules, 837
Phase transition
Possible low-temperature phase transition of Langmuir–Blodgett films of a charge–transfer complex detected by ESR, 391
Phase transition in adsorption layers at the air–water interface: structure features of the condensed phase, 842
Phase transition pressure
Monolayer properties of alkylammonium perfluoroalkanoates on concentrated sodium chloride solution, 123
Phenol–Formaldehyde resin
A two-dimensional network of phenol–formaldehyde monolayers by the Langmuir–Blodgett technique, 486
Phospholipase A_2
Specific adsorption of PLA_2 at monolayers, 616
Phospholipid
Phase behavior of methyl branched 1-acyl-2-alkyl-glycerophosphoethanolamines, 28
Spreading concentration effect on the morphology of phospholipid monolayers, 84
Hydration and removal of supported phospholipid films in aqueous surfactant solutions, 247
In situ quartz crystal microbalance monitoring of Fab′-fragment binding to linker lipids in a phosphatidylcholine monolayer matrix. Application to immunosensors, 643
Phospholipid adsorption layers
Interfacial relaxation of phospholipid layers at a liquid–liquid interface, 224
Phospholipid bilayer
The electrical characterization of supported phospholipid bilayers using titanium/titanium oxide microelectrodes, 758
Phospholipid monolayers
Influence of head group methylation on the phase behavior of lipid monolayers, 256
Photocurrent
Photoinduced electron transfer in a MIM device composed of ferrocene-flavin-viologen-TCNQ molecular heterojunctions, 671
Photocurrent of bacteriorhodopsin films deposited by electrophoretic method, 698
Photoelectric properties
Negative photoelectrical properties of adsorption Langmuir–Blodgett films, 399
Photoelectron
The effect of molecular structure and of three-dimensional order on electron transmission through thin organic layers, 357
Photo-induced electron transfer
The accumulation of photochromic energy acceptor species in A–S dyad Langmuir–Blodgett films, 718
Photoisomerization
Light-induced J-aggregation in mixed Langmuir–Blodgett films of selenium-containing cyanine and azobenzene, 813
Photoisomerization induction
Photoinduced properties of liquid crystalline azobenzene polymer in Langmuir–Blodgett films investigated by surface plasmon resonance, 427
Photoreceptor
Photoreceptor composed of spiropyran–TCNQ films for image extraction, 703
Photo-recording
Complex formation between amphiphilic organic ligands and transition metal ions in monolayers and LB multilayers, 491
Photorefractive effect
Assembly and applications of the inorganic nanocrystals in polymer networks, 536

Photosensitive properties
Photosensitive and ionoselective properties of the amphipilic crown-ether dye in monolayers, 821
Photovoltage
The investigation of a localized transition of poly(*p*-phenylenevinylene), 419
Phthalocyanines
Inclusion phenomenon in mixed floating layers containing phthalocyanines, 104
Polar order
A novel supramolecular self-assembly thin film with spontaneous polar order, 172
Polarisation modulation infrared reflection–absorption spectroscopy (IRRAS)
Polarisation modulation IRRAS investigation of a cellulose ether at the air/water interface, 299
Poly(3-alkylthiophene)
Langmuir–Blodgett films manipulation of regioregular poly(3-alkylthiophene)s, 469
Polyamic acid alkylamine salt
Thermally stimulated currents of Langmuir–Blodgett films, 403
Polyaniline
Implications of using *m*-cresol in the Langmuir–Blodgett processing of polyaniline, 60
A study on X-ray irradiation of composite polyaniline LB films, 808
Polydimethylsiloxane
Langmuir monolayers of polydimethylsiloxane with controllable surface potential, 816
Polyelectrolyte complexes
Monolayers of complexes from amphiphiles and rigid rod-like polyelectrolytes, 90
Polyelectrolyte
Chemically modified electrode via layer-by-layer deposition of glucose oxidase (GOD) and polycation-bearing Os complex, 730
Layer-by-layer self-assembly of polyelectrolyte and water soluble cyanine dye, 748
Ultrathin membranes for gas separation and pervaporation prepared upon electrostatic self-assembly of polyelectrolytes, 762
Ultrathin multilayers made by alternate deposition of ionenes and polyvinylsulfate: from unstable to stable growth, 734
Polyelectrolyte thin film
Optical sensor with active matrix built from polyelectrolytes–smart molecules mixture, 743
Poly(methyl methacrylate)
The compatibility in binary mixed monolayer films; poly(-methyl methacrylate) and random copolymer of styrene and acrylonitrile, 42
Poly(methylmethacrylate)
Light-emitting diodes from dye-insulating matrix Langmuir–Blodgett films, 712
Poly(octadecylacrylate)
Study on microstructures of mixed monolayers of poly (octadecylacrylate) and octadecanol in relation to the retardation of water evaporation, 109
Poly(*o*-methoxyaniline)
Adsorption isotherms of poly(*o*-methoxyaniline), 739
Poly(*p*-phenylenevinylene) thin film
The investigation of a localized transition of poly(*p*-phenylenevinylene), 419
Poly(3-substituted thiophene)
Fabrication of chiral poly(thiophene) Langmuir–Blodgett films, 454
Polyether
Temperature-independent conductivity of Langmuir–Blodgett films of a helical polymer and its salt complex, 364
The preparation and conductivity of LB films of a novel polymer electrolyte and its complexes with sodium triflate and eicosylamine, 473
Polyimide
Composite Langmuir–Blodgett films containing polypyrrole and polyimide, 127
Polyimide Langmuir–Blodgett film
Evaluation of liquid crystal molecules on polyimide LB films using attenuated total reflection measurement, 353
Polyion complex
Mesoscopic patterns of molecular aggregates on solid substrates, 854
Polymer
High glass transition temperature syndioregic second-order non-linear optical polymer in Langmuir–Blodgett–Kuhn films, 5
Monolayers and Langmuir–Blodgett multilayers of urethane-substituted diacetylene polymers with different molecular weight, 336
Molecular photopatterning with a two-dimensional network of polymer LB films, 833
Polymer electrolyte
Temperature-independent conductivity of Langmuir–Blodgett films of a helical polymer and its salt complex, 364
The preparation and conductivity of LB films of a novel polymer electrolyte and its complexes with sodium triflate and eicosylamine, 473
Polymer support
Formation of tethered supported bilayers via membrane-inserting reactive lipids, 767
Polymerization
LB films of non-amphiphilic diacetylene-1,4(bis-(3-quinolyl)-buta-1,3-diyne (DQ), 378
Polymethylphenylmethacrylate
Nanometer-scale lithography of the Langmuir–Blodgett films with atomic force microscope, 690
Polyoxometalate
Polyoxometalates in Langmuir–Blodgett films: toward new magnetic materials, 439
Polypyrrole
Composite Langmuir–Blodgett films containing polypyrrole and polyimide, 127
Polypyrrole film
SAW gas detection using Langmuir–Blodgett polypyrrole films, 694
Polysiloxane
Cd^{2+} and Mn^{2+} incorporation in copolysiloxane/eicosylamine alternate layer LB films: influence on pyroelectric activity, 369
Polysulfone
Aggregation and orientation phenomena in constrained films of LC poly(olefin sulfone)s, 214

Polyvinylsulfonic acid
Adsorption isotherms of poly(*o*-methoxyaniline), 739
Porphyrin
Optical response of monolayer films of a metal-free sulfonamido-porphyrin, 315
Gas-sensing properties of porphyrin dimer Langmuir–Blodgett films, 341
Porphyrin dimer
Gas-sensing properties of porphyrin dimer Langmuir–Blodgett films, 341
Power-law conductivity
Power-law conductivity in merocyanine LB films, 387
Preferential adsorption
Mixed silane self assembled monolayers and their in situ modification, 199
Protein Langmuir–Blodgett films
Synchrotron study of heat induced order in protein Langmuir–Blodgett films, 636
Protein stabilization
Study of horseradish peroxidase activity in alternate-layer Langmuir–Blodgett films, 621
Pulmonary surfactant
The role of pulmonary surfactant protein C during the breathing cycle, 632
Pyroelectric
The temporal and thermal stability of pyroelectric calix[8]arene Langmuir–Blodgett films, 431
Pyroelectricity
Cd^{2+} and Mn^{2+} incorporation in copolysiloxane/eicosylamine alternate layer LB films: influence on pyroelectric activity, 369
Pyrrole derivative
In-plane orientation of pyrrole derivatives bearing a side-on liquid crystal group, 1
Quantum efficiency
Light emission from electroluminescent Langmuir–Blodgett films of a polyester derived from oligothiophene, 715
Quartz crystal microbalance
Adsorption kinetics of alkanethiols studied by quartz crystal microbalance, 191
Hydration and removal of supported phospholipid films in aqueous surfactant solutions, 247
In situ quartz crystal microbalance monitoring of Fab′-fragment binding to linker lipids in a phosphatidylcholine monolayer matrix. Application to immunosensors, 643
Molecular sifter using space controlled Langmuir–Blodgett films by fullerene molecules, 655
Hydration number of calcium palmitate LB film deposited on a piezoelectric quartz crystal plate, 722
Random copolymer of the styrene and the acrylonitrile
The compatibility in binary mixed monolayer films: poly(-methyl methacrylate) and random copolymer of styrene and acrylonitrile, 42
Reaction center protein
Effects of counterions on the orientation control of photosynthetic reaction center proteins in an applied bias-voltage Langmuir–Blodgett method, 800
Reactive lipid synthesis
Formation of tethered supported bilayers via membrane-inserting reactive lipids, 767
Reflection absorption infrared spectroscopy (RAIR)
Effect of the molecular interaction on molecular packing and orientation in azobenzene-functionalized self-assembled monolayers on gold, 195
Regioregularity
Fabrication of chiral poly(thiophene) Langmuir–Blodgett films, 454
Langmuir–Blodgett films manipulation of regioregular poly(3-alkylthiophene)s, 469
Relaxation phenomena
Investigation of dielectric relaxation phenomena in liquid crystal monolayer at the air–water interface, 232
Relaxation time
Investigation of dielectric relaxation phenomena in liquid crystal monolayer at the air–water interface, 232
Resist
Molecular photopatterning with a two-dimensional network of polymer LB films, 833
Resonances
Characterization of oligothiophene films by high resolution electron energy loss spectroscopy, 252
Retardation evaporation
Study on microstructures of mixed monolayers of poly (octadecylacrylate) and octadecanol in relation to the retardation of water evaporation, 109
Reversed micelle
Structure and characterization of surfactant-capped CdS nanoparticle films by the Langmuir–Blodgett technique, 559
Rhodopsin films
Langmuir–Blodgett films of rhodopsin: an infrared spectroscopic study, 118
Rhodopsin secondary structure
Langmuir–Blodgett films of rhodopsin: an infrared spectroscopic study, 118
Rubrene dye
Light-emitting diodes from dye-insulating matrix Langmuir–Blodgett films, 712
Ruthenium
Light emitting electrochemical devices from sequentially adsorbed multilayers of a polymeric ruthenium (II) complex and various polyanions, 663
Sandwiched structure
Gold nanoparticulate film bound to silicon surface with self-assembled monolayers, 591
SAW device
SAW gas detection using Langmuir–Blodgett polypyrrole films, 694
SAW NH_3 gas sensor
SAW gas detection using Langmuir–Blodgett polypyrrole films, 694
Scanning electron microscopy
SFM and SEM investigation of CdS layers from Langmuir–Blodgett film templates, 532
Self-assembled mono- and multilayers of monodisperse cationic and anionic latex particles, 752
Scanning force microscopy
Dependence of the measured monolayer height on applied forces in scanning force microscopy, 262
Molecular property related silver decoration on fatty acid Langmuir–Blodgett monolayers, 268
SFM and SEM investigation of CdS layers from Langmuir–Blodgett film templates, 532

The role of pulmonary surfactant protein C during the breathing cycle, 632
Tobacco mosaic virus adsorption on self-assembled and Langmuir–Blodgett monolayers studied by TIRF and SFM, 824
Scanning force microscopy/scanning tunneling microscopy
Preparation and characterization of Langmuir monolayers and Langmuir–Blodgett films of nanosized Au_{55}-clusters, 520
Scanning tunneling microscopy
Langmuir–Blodgett films in the development of high temperature single electron tunneling devices, 550
Scattered light
Scattered light due to excited surface plasmon in arachidic acid LB ultrathin films on silver thin films, 360
Second harmonic generation
High glass transition temperature syndioregic second-order non-linear optical polymer in Langmuir–Blodgett–Kuhn films, 5
Modulation of second harmonic generation properties of tolan and stilbene derivatives by monolayer assembling, 423
A comment upon the second-order non-linear optical properties of 2,4-bis(*N*-octadecylpyrrol-2-yl)squaraine, 461
Characterization of Langmuir–Blodgett films of *N,N*-dioctadecyl-*p*-nitrophenylaniline mixed with arachidic acid, 607
Second harmonic microscopy
Second-harmonic imaging of surface order and symmetry, 241
Secondary ion mass spectrometry
The role of pulmonary surfactant protein C during the breathing cycle, 632
Self-aggregation
Preparation of semiconductor superlattices from LB precursor, 503
Self-assembled film
Layer-by-layer self-assembly of polyelectrolyte and water soluble cyanine dye, 748
Self-assembled monolayer
Fabrication of colloidal gold micro-patterns using photolithographed self-assembled monolayers as templates, 176
Adsorption kinetics of alkanethiols studied by quartz crystal microbalance, 191
Effect of the molecular interaction on molecular packing and orientation in azobenzene-functionalized self-assembled monolayers on gold, 195
HREELS characterization of surfaces and interfaces in self-assembled molecular monolayers, 236
Fluorescence probes for chemical reactivity at the interface of a self-assembled monolayer, 477
An electrochemical study of the changes in the passivation of an aluminum alloy surface induced by the presence of a self-assembled monolayer, 481
Template induced crystallization of biominerals on self-assembled monolayers of alkylthiols, 554
Growth of FeO(OH) crystals on self-assembled monolayers on gold, 571
Gold nanoparticulate film bound to silicon surface with self-assembled monolayers, 591
Assembling colloidal Au nanoparticles with functionalized self-assembled monolayers, 595
Force titration of amino group-terminated self-assembled monolayers of 4-aminothiophenol on gold using chemical force microscopy, 778
Self-assembled multilayer
Thermally stimulated currents and electrical conduction in self-assembled ultrathin films, 209
Self-assembly
Surfactant monolayers at solid–liquid interfaces: conformation and interaction, 161
Kinetics of self-assembled silane monolayers at various temperatures: evidence of 2D foam, 166
A novel supramolecular self-assembly thin film with spontaneous polar order, 172
Atomic force microscopic studies on the growth of self-assembled monolayers on $SrTiO_3$-surfaces, 185
Multilayer assemblies of colloidal ZnS doped with silver and polyelectrolytes based on electrostatic interaction, 528
Chemically modified electrode via layer-by-layer deposition of glucose oxidase (GOD) and polycation-bearing Os complex, 730
Adsorption isotherms of poly(*o*-methoxyaniline), 739
Self-assembled mono- and multilayers of monodisperse cationic and anionic latex particles, 752
Self-packing
Study on the self-packing of SnO_2 nanoparticles at the air–hydrosol interface and its composite LB films with arachidic acid, 33
Semiconductor superlattices
Preparation of semiconductor superlattices from LB precursor, 503
SERS
Gold nanoparticulate film bound to silicon surface with self-assembled monolayers, 591
SERS-active substrate
Assembling colloidal Au nanoparticles with functionalized self-assembled monolayers, 595
Shear-induced orientation
In-plane orientation of mesoscopic domains in Langmuir and Langmuir–Blodgett films induced by rotating disks, 24
Sidechain
Polarisation modulation IRRAS investigation of a cellulose ether at the air/water interface, 299
Silanization
Gold nanoparticulate film bound to silicon surface with self-assembled monolayers, 591
Silicon
Gold nanoparticulate film bound to silicon surface with self-assembled monolayers, 591
Temperature dependence of current transport in palladium/LB-film/silicon diodes, 652
Silver decoration
Molecular property related silver decoration on fatty acid Langmuir–Blodgett monolayers, 268
Silver doped ZnS colloids
Multilayer assemblies of colloidal ZnS doped with silver and polyelectrolytes based on electrostatic interaction, 528
Silver island
Surface-enhanced infrared spectra of azobenzene LB monolayers on silver island film, 287
Single macromolecule
Direct observation of the behavior of single macromolecules at the gas–liquid interface, 781
Size-Quantization
Size-quantization in extremely small CdS clusters formed in calixarene LB films, 510

Small angle X-ray reflection
Dipping induced orientation in Langmuir–Blodgett multilayers of a flexible PPV precursor polymer, 65
SnO_2, Nanoparticles
Study on the self-packing of SnO_2 nanoparticles at the air–hydrosol interface and its composite LB films with arachidic acid, 33
Sodium
The preparation and conductivity of LB films of a novel polymer electrolyte and its complexes with sodium triflate and eicosylamine, 473
Spectroscopy studies
FTIR and UV-vis spectroscopy studies of Langmuir–Blodgett films of stearic acid/γ-Fe_2O_3 nanoparticles, 541
Spin probe molecules
Phase separation of mixed LB films containing spin probe molecules, 837
Spin–crossover
Spin-crossover complex stabilized on a formamide/water subphase, 435
Spiropyran
Photoreceptor composed of spiropyran–TCNQ films for image extraction, 703
Spreading conditions
Spreading concentration effect on the morphology of phospholipid monolayers, 84
Stability
The temporal and thermal stability of pyroelectric calix[8]arene Langmuir–Blodgett films, 431
Stearic acid
An electrochemical study of the changes in the passivation of an aluminum alloy surface induced by the presence of a self-assembled monolayer, 481
A study on gas sensor using electrical properties of fatty acid Langmuir–Blodgett films, 612
Stearic acid/γ-Fe_2O_3 nanoparticles
FTIR and UV-vis spectroscopy studies of Langmuir–Blodgett films of stearic acid/γ-Fe_2O_3 nanoparticles, 541
Stilbene
Modulation of second harmonic generation properties of tolan and stilbene derivatives by monolayer assembling, 423
Structural aging
High glass transition temperature syndioregic second-order non-linear optical polymer in Langmuir–Blodgett–Kuhn films, 5
Structural defects
Structures and defects in Langmuir–Blodgett films, 295
Subphase pH
Variation of monolayer behaviour and molecular packing in zinc arachidate LB films with subphase pH, 787
Substituted phthalocyanine
On the characterisation and gas sensing properties of Cu(II) tetra(alkylamino carbonyl) phthalocyanine LB films, 465
Substrate conductivity
Fabrication and characterization of charge-transfer complex films by a bias-voltage LB technique, 792
Sulfonyl amphiphiles
Langmuir–Blodgett films of new sulfonyl amphiphiles containing azobenzene chromophore, 78
Sum-frequency generation
Surfactant monolayers at solid–liquid interfaces: conformation and interaction, 161
Sum-frequency microscopy
Second-harmonic imaging of surface order and symmetry, 241
Supramolecules
A novel supramolecular self-assembly thin film with spontaneous polar order, 172
Surface density
Surfactant monolayers at solid–liquid interfaces: conformation and interaction, 161
Surface dipole moment
Monolayer properties of alkylammonium perfluoroalkanoates on concentrated sodium chloride solution, 123
Surface monolayer
Construction of two-dimensional DNA-mimetics: supramolecular architecture with highly stacked base-pairs of amphiphilic adenine and thymine at the air–water interface, 603
Surface order
Second-harmonic imaging of surface order and symmetry, 241
Surface p$K_{1/2}$ value
Force titration of amino group-terminated self-assembled monolayers of 4-aminothiophenol on gold using chemical force microscopy, 778
Surface photovoltage
Heterostructure of silicon/organized-polymer-film with varied liquid crystalline states: a photovoltaic study, 412
Photovoltaic properties of novel conjugated oligomer/n-Si(111) heterostructrues, 415
Study on the photo-induced interfacial charge transfer in TiO_2/Fe_2O_3 heterostructured composite film, 568
The effect of addition of second donor layer on charge separation in LB films, 708
Surface plasmon
Langmuir–Blodgett films of new sulfonyl amphiphiles containing azobenzene chromophore, 78
Scattered light due to excited surface plasmon in arachidic acid LB ultrathin films on silver thin films, 360
Surface plasmon polariton
Evaluation of liquid crystal molecules on polyimide LB films using attenuated total reflection measurement, 353
Surface plasmon resonance
Photoinduced properties of liquid crystalline azobenzene polymer in Langmuir–Blodgett films investigated by surface plasmon resonance, 427
Optical sensing of aromatic hydrocarbons using Langmuir–Blodgett films of a Schiff base co-ordination polymer, 726
Surface plasmon resonance, Langmuir–Blodgett films
DNA-containing organized molecular structure based on controlled assembly on supported monolayers, 647
Surface potential
Monolayer properties of alkylammonium perfluoroalkanoates on concentrated sodium chloride solution, 123
Interaction of DPPC monolayer at air–water interface with hydrophobic ions, 599
Langmuir monolayers of polydimethylsiloxane with controllable surface potential, 816
Surface pressure relaxation measurements
Monolayer studies of methyl *vic*-dihydroxyoctadecanoates, 180

Surface pressure transient
Phase transition in adsorption layers at the air–water interface: structure features of the condensed phase, 842
Surface pressure-area isotherms
Monolayer properties of amphiphilic tetrakis(phenylethynyl)-benzene compounds, 74
Surface roughness
Structures and defects in Langmuir–Blodgett films, 295
Scattered light due to excited surface plasmon in arachidic acid LB ultrathin films on silver thin films, 360
Surface spectrophotometry
Study of Langmuir monolayers of crown-ether C_{60} derivatives and their interaction with different subphase ions, 141
Surface symmetry
Second-harmonic imaging of surface order and symmetry, 241
Surface-enhanced infrared spectroscopy (SEIRS)
Surface-enhanced infrared spectra of azobenzene LB monolayers on silver island film, 287
Surface-force apparatus
Effect of substrate anchoring on the mechanical strength of Langmuir–Blodgett bilayers, 772
Surfaces
HREELS characterization of surfaces and interfaces in self-assembled molecular monolayers, 236
Surfactant
Hydration and removal of supported phospholipid films in aqueous surfactant solutions, 247
Surfactant monolayers
Surfactant monolayers at solid–liquid interfaces: conformation and interaction, 161
Surfactant protein C
The role of pulmonary surfactant protein C during the breathing cycle, 632
Synchroton grazing incidence X-ray diffraction
Specific adsorption of PLA_2 at monolayers, 616
TCNQ
Transient fluorescence in flavin/TCNQ hetero LB film, 373
Photoreceptor composed of spiropyran–TCNQ films for image extraction, 703
Templated crystal growth
Template induced crystallization of biominerals on self-assembled monolayers of alkylthiols, 554
Ternary system
Control of aggregate formation in merocyanine Langmuir–Blodgett films, 345
Tethered supported membrane
Formation of tethered supported bilayers via membrane-inserting reactive lipids, 767
Tetrathiafulvalene
In search of D-σ-A molecular rectifiers: the D-σ-A system derived from triptycenequinone and tetrathiafulvalene, 100
Tetrathiafulvalene-based Langmuir–Blodgett film
Charge-transfer interactions and non-linear optical properties of tetrathiafulvalene-based Langmuir–Blodgett films, 348
Thermal decomposition
Two-dimensional array of silver nanoparticles, 524
Thermal stability
Synchrotron study of heat induced order in protein Langmuir–Blodgett films, 636
Thermally stimulated current
Thermally stimulated currents and electrical conduction in self-assembled ultrathin films, 209
Thermally stimulated currents of Langmuir–Blodgett films, 403
Thermogravimetric analysis
Thermally stimulated currents of Langmuir–Blodgett films, 403
Thin films
Novel nitroso-compounds Langmuir–Blodgett films, 136
Gas-sensing properties of porphyrin dimer Langmuir–Blodgett films, 341
Growth and characterization of benzylic amide [2]catenane thin films, 321
Thin-film diode
Power-law conductivity in merocyanine LB films, 387
Thiols
HREELS characterization of surfaces and interfaces in self-assembled molecular monolayers, 236
Thiophene oligomer
High-resolution electron energy loss spectroscopy studies on the electronic structure of quinquethiophene (5T) and sexithiophene (6T) films, 291
Thiophenes
Characterization of oligothiophene films by high resolution electron energy loss spectroscopy, 252
Third-order optical non-linearity
Langmuir–Blodgett films manipulation of regioregular poly(3-alkylthiophene)s, 469
Three-component complexes
The preparation and conductivity of LB films of a novel polymer electrolyte and its complexes with sodium triflate and eicosylamine, 473
Thymine
Construction of two-dimensional DNA-mimetics: supramolecular architecture with highly stacked base-pairs of amphiphilic adenine and thymine at the air–water interface, 603
Tilt angle
Molecular orientation of octaalkoxyphthalocyanine derivatives in Langmuir–Blodgett films, 87
Evaluation of liquid crystal molecules on polyimide LB films using attenuated total reflection measurement, 353
TiO_2
Preparation of covalently modified organic–inorganic composite nanoparticles and their interfacial electron transfer researches, 563
Study on the photo-induced interfacial charge transfer in TiO_2/Fe_2O_3 heterostructured composite film, 568
Titanium/titanium oxide microelectrode
The electrical characterization of supported phospholipid bilayers using titanium/titanium oxide microelectrodes, 758
Tobacco mosaic virus
Tobacco mosaic virus adsorption on self-assembled and Langmuir–Blodgett monolayers studied by TIRF and SFM, 824
Tolan
Modulation of second harmonic generation properties of tolan and stilbene derivatives by monolayer assembling, 423
Total internal reflection fluorescence
Tobacco mosaic virus adsorption on self-assembled and Langmuir–Blodgett monolayers studied by TIRF and SFM, 824

Transient current
Thermally stimulated currents and electrical conduction in self-assembled ultrathin films, 209
Transport properties
Recent progress in metallic Langmuir–Blodgett films based on TTF derivatives, 14
Triad
The effect of addition of second donor layer on charge separation in LB films, 708
Trigger molecule
Control of aggregate formation in merocyanine Langmuir–Blodgett films, 345
Triplet states
Characterization of oligothiophene films by high resolution electron energy loss spectroscopy, 252
Triptycenequinone
In search of D-σ-A molecular rectifiers: the D-σ-A system derived from triptycenequinone and tetrathiafulvalene, 100
Triton X-100
Study of spontaneous insertion of non-ionic surfactant Triton X-100 into phospholipid monolayers, 69
Tunneling transport
Negative-resistance device using organic-dye-doped polymer film, 545
Two-dimensional array
Two-dimensional array of silver nanoparticles, 524
Two-dimensional magnet
Diluted magnetic semiconductor nanoparticles fabricated by the Langmuir–Blodgett technique, 586
Two-dimensional network
Molecular photopatterning with a two-dimensional network of polymer LB films, 833
Ultrathin film
Ultrathin multilayers made by alternate deposition of ionenes and polyvinylsulfate: from unstable to stable growth, 734
Ultraviolet photoelectron spectroscopy
Characterization of ultrathin films of titanyl phthalocyanine on graphite: PIES and UPS study, 278
Unimolecular electrical rectification
Observation of unimolecular electrical rectification in hexadecylquinolinium tricyanoquinodimethanide, 326
UV-vis spectroscopy
Dipping induced orientation in Langmuir–Blodgett multilayers of a flexible PPV precursor polymer, 65
Monolayers of complexes from amphiphiles and rigid rod-like polyelectrolytes, 90
UV-vis spectrum
High-resolution electron energy loss spectroscopy studies on the electronic structure of quinquethiophene (5T) and sexithiophene (6T) films, 291
UV-visible absorption spectrum
Control of aggregate formation in merocyanine Langmuir–Blodgett films, 345
Valley current
Negative-resistance device using organic-dye-doped polymer film, 545
Vapour sensing
Optical sensing of aromatic hydrocarbons using Langmuir–Blodgett films of a Schiff base co-ordination polymer, 726
Vertical descent method
Deposition of Langmuir monolayers using conical trough, 9
Vibrational spectrum
Growth and characterization of benzylic amide [2]catenane thin films, 321
Virus adsorption
Tobacco mosaic virus adsorption on self-assembled and Langmuir–Blodgett monolayers studied by TIRF and SFM, 824
Water–air interface
Lipopeptides of myelin basic protein in mono- and multilayers, 37

X-ray diffraction
Phase behavior of methyl branched 1-acyl-2-alkyl-glycerophosphoethanolamines, 28
Polyoxometalates in Langmuir–Blodgett films: toward new magnetic materials, 439
Characterization of 16-mer polyaniline composite Langmuir–Blodgett films, 576
X-ray irradiation
A study on X-ray irradiation of composite polyaniline LB films, 808
X-ray photoelectron spectroscopy
Monolayer assembly of long-chain histidine derivative for arrangement of cytochrome *C* molecules, 113
X-ray photoelectron spectroscopy
Mixed silane self assembled monolayers and their in situ modification, 199
Cd^{2+} and Mn^{2+} incorporation in copolysiloxane/eicosylamine alternate layer LB films: influence on pyroelectric activity, 369
X-ray reflectivity
In-plane orientation of pyrrole derivatives bearing a side-on liquid crystal group, 1
Breakdown of the Poisson-Boltzmann description for electrical double layers involving large multivalent ions, 19
An X-ray reflectivity study of monolayers and bilayers of archae lipids on a solid substrate, 52
Analysis of defects in CdA Langmuir–Blodgett film using synchrotron X-ray radiation, 273
Myelin model membranes on solid substrates, 627
Structures and defects in Langmuir–Blodgett films, 295
Ultrathin multilayers made by alternate deposition of ionenes and polyvinylsulfate: from unstable to stable growth, 734
X-ray scattering
Synchrotron study of heat induced order in protein Langmuir–Blodgett films, 636
Zinc arachidate
Variation of monolayer behaviour and molecular packing in zinc arachidate LB films with subphase pH, 787
Zirconium phosphonate
Organic/inorganic Langmuir–Blodgett films based on metal phosphonates 2: zirconium phosphonate-based alternating layer films, 131
ZnS spin-casting film
Multilayer assemblies of colloidal ZnS doped with silver and polyelectrolytes based on electrostatic interaction, 528
